ICMS CYBER SOLUTION TRAINING SERVICES

OUR IN-HOUSE TRAINING COURSES PROVIDE A COST-EFFECTIVE SOLUTION THAT OFFERS MANY BENEFITS FOR THE ORGANIZATION:

OUR SERVICE

In today's digital age, knowing how to correctly handle electronic data is a vital skill for any organization that deals with electronic evidence, such as data breach investigations, ransomware attacks, internal frauds and more.

When faced with a cybersecurity incident, it is important to respond quickly and handle the electronic evidence correctly to prevent loss or corruption of the evidence.

“ We develop and deliver customized in-house forensic/cybersecurity training courses for investigators, IT, incident response teams, auditors, business managers and lawyers. ”

WHY CHOOSE US ?

- ✓ All courses can be customized to suit your specific requirements.
- ✓ Cost effective.
- ✓ Practical and relevant.
- ✓ Enhance the skills and confidence of the staff.
- ✓ Courses developed & delivered by experienced forensic investigators.
- ✓ Software neutral using a range of free and open-source tools.

ICMS Cyber Solution Training Services

OUR TRAINING PROGRAMS

We offer digital forensic and incident response training to help organizations build their in-house capabilities.

Our training programs are tailored to meet the specific needs of each organization, equipping their teams with the necessary skills and knowledge to handle cyber incidents effectively.

1-Day Forensic Techniques for Auditors

- A 1-day course designed to provide auditors and IT staff with an in-depth understanding of various forensic techniques which can be used to supplement their internal audit processes.

2-Day Digital Forensics - Data Collections for First Responders

- The 2-day Digital Forensics - Data Collections for First Responders Course is ideal for IT staff or members of an incident response team who need to forensically preserve electronically stored information (ESI) following a cybersecurity incident or to support legal action.

3-Day Digital Forensics - Foundation for Investigators course

- The 3-day Digital Forensics - Foundation for Investigators course provides essential knowledge and practical skills for professionals involved in investigating digital incidents, cybercrimes, and data breaches. Whether you're starting a career as a digital forensic investigator, cybersecurity analyst, or part of an incident response team, this course equips you with the skills to analyse digital evidence effectively.

4-Day Digital Forensic - Foundation Training Course

- The 4-day Digital Forensic Foundation Course is ideal for those wishing to pursue a career as a digital forensic investigator or for those cybersecurity specialists who wish to enhance their incident response skills.

1-Day Cybersecurity Training for Managers

- While cyber threats may not be in your control, your cybersecurity strategy is, and you should be looking at a risk-based approach. This cyber security training course prepares managers and senior executives to understand, assess, and take a proactive approach in cybersecurity.

 Contact us today to find out more details about our training courses. We look forward to discussing your specific training needs.
